

Destination-as-a-Platform 360

Breeze Travel Solution's Destination-as-a-Platform 360 (DaaP 360) stands out as a transformative platform that enhances the travel experience while also fostering local community development. Through a blend of cutting-edge AI capabilities, connectivity features, and a focus on supporting local tourism, this platform offers destinations a more integrated travel ecosystem.

Comprehensive Trip Planning

DaaP 360 allow users to plan every aspect of their journey. Users can find, plan, and book accommodations, tours & activities, flights, rental cars, and pre-curated packages.

AI driven Itinerary Builder

DaaP 360 leverages advanced AI to make travel planning smarter and more intuitive. The platform gathers data helping each traveler find experiences tailored to their preferences.

Local Experiences and Community Development

At the heart of DaaP 360 is a commitment to promoting local experiences. The platform helps to ensure that tourism dollars remain within the local economy.

Personalizable Curated Packages

Understanding that every traveler has unique preferences, 360 Destination leverages advanced algorithms to suggest tailor-made travel experiences.

Multi-destination Capable

One of the standout features of DaaP 360 is its multi-destination capability. This allows users to plan and manage trips that include multiple locations seamlessly.

Supplier Contracts Connectivity

As technology continues to play a pivotal role in how we travel, DaaP 360 supports the digitization of the local tourism economy and enables direct and indirect connectivity to a vast inventory of suppliers.

Payment Processing & Reconciliation

DaaP 360 streamlines invoice and credit card processing of all reservation transactions. At the same time seamlessly handling transaction reconciliations with all suppliers.

In Destination Assistant & App

The accompanying in-destination app enhances user engagement through features like digital billboards, geo-tracking, and push notifications. Allowing users to discover activities and attractions nearby.

Primary Data Insights

Understanding traveler behavior is crucial for improving services and tailoring experiences. DaaP 360 captures primary data and user insights, offering valuable analytics to help future optimization.

Managed Services & Reservation Support

Breeze alleviates the pressure on destinations by providing managed services and comprehensive reservation management. This eliminates the need for additional resources to oversee a travel program.
